4 November 2002

AMENDMENT NO. 10

PROJECT NO. DACW51-02-B-0001

TECHNICAL REQUIREMENTS INSTRUCTIONS TO OFFERORS

MAINTENANCE DREDGING AND DISPOSITION OF DREDGED MATERIAL FROM FLUSHING BAY & CREEK, NEW YORK, FEDERAL NAVIGATION CHANNEL

TO PROSPECTIVE BIDDERS:

The purpose of this amendment is to reopen step 1 of the two step procurement process due to the approaching environmental no dredge window. The current schedule will not allow the sampling of the channel and subsequent permits to be available in time to perform the work as planned in January and February of 2003. The no dredge period runs from February 1 to June 30 of any year. The environmental window in which no dredging can occur, may affect the availability of the disposal site, dredging capabilities, transportation capabilities and processing capabilities.

The new expected performance period for the project is from **July to August 2003**. Based on this new project performance period, each offeror is required to revise their proposal to verify their ability to perform the work in the new performance period. Each offeror shall reconfirm its commitment and availability of dredge plant and transportation equipment which includes but is not limited to tugs and scows, and the availability of the processing facility and disposal site for July and August of 2003. All sections of the proposal submitted as per section V. Required Submittals should be checked for validity in regard to the new work performance period.

If equipment formerly committed to this project is unavailable for the new project performance period, then new equipment may be proposed. The new proposed equipment must be available for use during the new project performance period and comply with all RFP submittal requirements. Specifically, offerors must provide proof of current permits, licenses, registrations or other certifications in compliance with the proposed dredging and transportation methods. Transportation equipment includes tugs and scows as well as any other vehicles to transport the dredged material.

A revised proposal indicating that the dredging, transportation, and processing equipment, and disposal facility are available during the new project performance period is required. In addition, proof of the Disposal Site Owner's approval granting the Offeror the right of dredged material disposal at that site shall be submitted.

Due to the reopening of step 1, the step 2 bid opening scheduled for November 8, 2002 is postponed. A new step 2 Invitation for Bids will be issued after the receipt and determination that revised proposals are technically acceptable.

Furthermore, the due date for submission of revised proposals as part of the reopening of step 1 will be issued at a later date.

Sincerely,

Ella Snell
Chief, Contracting Division

NOTE: Only offerors that had submitted proposals in the final discussions under the previously held step 1 are requested to submit revised proposals under this Amendment. That is, revised proposals will be accepted only from offerors who had submitted revised proposals in response to discussion letters dated July 18, 2002 from this office.

(End of Summary of Changes)
